DRAFT FOR REVIEW

B2B Detailed Catalog Draft

For main contractors, specialist subcontractors, architects, consultants, and quantity surveyors specifying GFRC/GRC architectural systems.

⚠ This document is a draft issued for review and testing purposes only. It must not be distributed externally. Content and specifications are subject to revision.

— ABOUT THE COMPANY

Durraka Factory for Industry

Durraka Factory for Industry is a Saudi-registered manufacturer of Glass Fibre Reinforced Concrete (GFRC/GRC) architectural systems. We supply engineered facade cladding, decorative elements, and heritage profiles to contractors, consultants, and project developers across the Kingdom of Saudi Arabia and the GCC.

Company Details	
Legal Name	Durraka Factory for Industry
CR Number	4602002725
Country	Kingdom of Saudi Arabia
Primary Market	Saudi Arabia · UAE · GCC
Product Type	GFRC / GRC Architectural Elements
Contact	info@durraka.com
Website	durraka.com

— CAPABILITY SUMMARY

- ✓ Custom mould engineering for bespoke geometry
- ✓ Full shop drawing preparation and submission
- ✓ Factory production with systematic QC
- ✓ Delivery and site coordination support
- ✓ Technical documentation for contractor files
- ✓ Design-stage collaboration with consultants
- ✓ Gulf climate-tested mixes and finishes

PRODUCT SYSTEMS

GFRC / GRC Systems Overview

All systems listed below are manufactured in our factory using alkali-resistant glass fibre reinforced cement mixes. Surface finishes, colours, and dimensional profiles are customised to project-specific requirements and approved shop drawings.

System	Typical Thickness	Max Panel Size (indicative)	Common Finishes
Facade Cladding Panels	12–18 mm	2.4 m × 1.2 m	Smooth, Sandblast, Textured
Cornice Profiles	20–40 mm	Custom run length	Smooth, Painted
Mashrabiya Screens	20–35 mm	1.2 m × 2.4 m	Smooth, Natural
Column Shafts	25–50 mm wall	Custom diameter / height	Smooth, Stone-effect
Dome Sections	20–40 mm	Custom segmented	Smooth, Painted
Ornamental Panels	15–30 mm	Custom per design	Smooth, Relief, Textured

Note: Panel sizes, thicknesses, and achievable spans depend on geometry, reinforcement, and structural requirements. Detailed structural data is provided separately under NDA for qualified project teams.

— SCOPE OF SUPPLY

Scope Categories for Contractors

The table below outlines how we categorise scope of supply for B2B project tenders. Use this to reference the correct package category in your BOQ or tender submission.

Package	Scope Description	Typical Units
Facade Cladding	External wall cladding panels — flat, curved, or profiled	m ²
Cornice Systems	Horizontal cornice runs — straight or curved on plan	Linear m
Mashrabiya Screens	Lattice or geometric privacy/decorative screens	m ²
Column Systems	Column shafts, bases, and capitals — all heights	Nr / Set
Dome Elements	Full or segmented domes, drum sections	Nr / m ²
Soffits & Ceilings	Underside cladding for canopies, balconies, soffits	m ²
Ornamental Panels	Feature panels, medallions, calligraphic reliefs	Nr / m ²
Custom	Project-specific elements not fitting above categories	Nr / m ²

Mixed-Scope Projects

Most projects include multiple scope categories. Submit your drawings and we will prepare a single consolidated proposal covering all GFRC elements.

Provisional Sums

At concept or early design stage, we can provide indicative budget ranges per m² or per element type for inclusion as provisional sums in the main contract.

DOCUMENTATION

Drawing and BOQ Requirements

To prepare an accurate tender or order, we require the following documentation from the main contractor or consultant team.

REQUIRED FOR TENDER

ARCHITECTURAL DRAWINGS

Plans, elevations, sections showing GFRC scope (PDF or DWG)

ELEMENT SCHEDULE

List of element types with approximate quantities (m² or Nr)

FINISH SPECIFICATION

Surface finish, colour reference, and texture requirements

PROJECT LOCATION

City, site address, and access constraints

PROGRAMME

Target start date and installation milestones

REQUIRED FOR ORDER

APPROVED SHOP DRAWINGS

Dimensioned shop drawings reviewed and stamped by consultant

SAMPLE APPROVAL

Approved physical or colour sample (finish and colour confirmed)

PURCHASE ORDER

Formal PO or subcontract/supply agreement

SITE READINESS CONFIRMATION

Confirmation of substrate readiness and access schedule

Shop drawings are prepared by Durraka after order placement and submitted to the consultant/architect for approval before production commences.

— STANDARD PROCESS

Project Workflow for Contractors

The following workflow applies to all B2B supply contracts. Timelines vary by project complexity and volume — indicative durations are shown for reference.

- 01 RFQ Submission** Day 1–2
Contractor submits drawings and scope via durraka.com or email. Durraka acknowledges within 1 business day.
- 02 Scope Review & Proposal** Day 3–7
Durraka prepares a preliminary scope breakdown, clarification list (if required), and indicative budget estimate.
- 03 Commercial Agreement** Week 2
On acceptance of proposal, a formal subcontract or supply agreement is executed. PO issued by main contractor.
- 04 Shop Drawing Preparation** Week 3–5
Durraka prepares dimensioned shop drawings for all GFRC elements and submits to consultant for approval.
- 05 Sample Approval** Week 4–6
Physical or colour samples submitted for contractor/consultant review. Production does not start until samples are approved.
- 06 Production** Weeks 6–12+
Factory production commences on receipt of approved shop drawings and samples. Production is staged to match site programme.
- 07 Quality Control & Dispatch** Per batch
Finished elements pass QC inspection. Client or third-party inspection can be arranged. Elements dispatched with delivery note and QC records.
- 08 Site Delivery** Per programme
Elements delivered to site on agreed schedule. Coordination with site foreman for crane/access requirements.

— QUALITY SYSTEM

QA / QC Overview

Quality control is embedded throughout the production cycle — not applied at the end.

Below is an overview of the QC framework applied to all B2B supply contracts.

— PRODUCTION QC STAGES

Stage	Check
Incoming Materials	Fibre grade, cement batch, admixture compliance
Mix Preparation	Water-cement ratio, consistency, temperature
Mould Condition	Dimensional accuracy, surface condition before cast
Casting	Layer consistency, coverage, and compaction
Curing	Curing method and duration per specification
Demould	Visual inspection, edge condition, surface finish
Dimensional Check	Key dimensions verified against shop drawing
Pre-Dispatch	Final visual and surface inspection before packaging

— DOCUMENTATION PROVIDED

- ✓ Delivery notes with element identification and quantity
- ✓ Production batch records (dates, quantities)
- ✓ Dimensional inspection reports (on request)
- ✓ Mix reference per batch (available on request)
- ✓ Photo documentation of elements pre-dispatch
- ✓ QC hold-point record (sample approval stage)

Third-party inspection by the main contractor or an approved independent inspector can be arranged at the factory prior to dispatch. Coordinate with Durraka at least 5 working days in advance.

— READY TO SUBMIT?

RFQ Submission Checklist

Use this checklist before submitting your RFQ to ensure we can prepare an accurate response without additional clarification rounds.

— PROJECT DETAILS

- ☐ Project name and city / location
- ☐ Project type (hospitality / commercial / residential / government)
- ☐ Current design stage
- ☐ Estimated GFRC scope (m² or element count)
- ☐ Target construction programme
- ☐ Main contractor name and contact
- ☐ Consultant / architect contact (if applicable)

— TECHNICAL INFORMATION

- ☐ Architectural drawings (PDF / DWG) attached
- ☐ GFRC element types identified on drawings
- ☐ Surface finish requirement noted
- ☐ Colour or material reference provided
- ☐ Special geometry or profile details flagged
- ☐ Site delivery constraints noted (if known)
- ☐ Any existing material specification referenced

How to Submit

Submit your RFQ online at durraka.com/request-quotation with all relevant drawings attached, or email your scope to info@durraka.com with the subject line: "RFQ — [Project Name] — [Your Company]".

We respond within 1–2 business days with a preliminary scope review or a list of clarification questions before proceeding to pricing.

CONTACT US

Contact Details & Next Steps

For all B2B enquiries, technical questions, or RFQ submissions, use the contact details below. Our technical sales team responds within 1–2 business days.

General & Sales Enquiries

Email: info@durraka.com

Website: durraka.com

RFQ Portal: durraka.com/request-quotation

NEXT STEPS

1

Submit Your RFQ

Use durraka.com/request-quotation or email info@durraka.com with your project drawings and scope.

2

Request Full Catalog

For additional technical documentation, request the full B2B catalog or NDA Annex at durraka.com/catalog.

3

Schedule a Consultation

For large or complex scopes, contact us to arrange a technical consultation with our design and sales team.

Submit Your RFQ Today

Visit durraka.com/request-quotation to submit your scope and receive a proposal within 1–2 business days.
